-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4 and 15-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 contradicts the "bottomless" limitation of claim 1 by stating that the base member is fixedly secured to the shell.

Claim 15 recites the limitation "said ceramic lining" in lines 5 and 6. There is insufficient antecedent basis for this limitation in the claim.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Todd and Tung in view of Hawn, Payson et al. (Payson) and Mitrovich.

Todd discloses a double walled fluid holding vessel comprising a metallic lining (6, 7) and shell (11). Tung teaches a double walled fluid holding vessel comprising a metallic lining (17) and shell (5). Todd and Tung disclose the invention except for the ceramic material of the shell and the substantially bottomless nature of the shell. Hawn, Payson and Mitrovich teach lined containers with ceramic outer shells. It would have been obvious to modify the outer shell to be ceramic as motivated by the improved visual appearance of ceramic containers. It would have been obvious to modify the outer shell to be substantially bottomless to save on material

and manufacturing cost, reduce weight and simplify the invention by omitting parts deemed unnecessary.

Official notice is taken that the metal materials of stainless steel, aluminum, titanium, tin and alloys thereof are well known and that the ceramic materials of porcelain, stoneware, earthenware and glass are well known. It would have been obvious to modify the materials based on the teachings of the characteristics of each material

Re claims 4, 13, 17 and 22, Official notice is taken that a separate base member of metallic material is well known in this art
